INTRODUCTION

Pitbull (\$PIT) is a decentralized digital currency with a secured, **audited smart contract** function and a unique deflationary **passive income** token-economic, creating its **ever-growing ecosystem** by building **decentralized utility apps** for blockchains and users. Released on March 17, 2021, on the Binance Smart Chain network, the Pitbull project has been firmly built and improved upon by the community since its inception. This power decentralization has allowed Pitbull to flourish with strong fundamentals. Pitbull stands as a solid milestone with the developments in the birth of the **Blockchain era**. Pitbull Community created this innovation with long-term visions that emphasize the success of the currency, and potentials for future integrations as the project progresses.

Within our **developing ecosystem**, Pitbull has launched PitSwap, PitFarm NFT farming, PitStop, PitLottery, PitSafe DeFi Asset Manager, PitCharts, PitTracker, and NFT collections tracing the roadmap. Within this new roadmap, more functional and innovative Dapps and platforms will be part of the Pitbull Ecosystem. Among them, PitGames, P2E Gaming system & Metaverse integrations, PitDao, PitMag online Communication Media, PitStore for Pitbull Merchandise are the most outstanding utilities. The Pitbull Team also periodically creates rare, 3D, character **NFT** collections for sale and auction.

The unique deflationary token-economic system of Pitbull is an easy way for holders to receive rewards directly to their wallet without staking or farming on other platforms but just by holding. Not only does this open investors to more profitable options, but also, it reduces gas costs and comes with some level of **peace of mind**. 2% of each transaction is automatically distributed to all holders including the dead address. This grants PIT investors continual rewards for holding and decreases the circulating supply exponentially as the percentage of the dead address holding grows. The **passive income** from holding PIT increases rapidly as PIT gains more recognition and thus more transaction volume.

"To see growing numbers of PIT in your wallet just by holding is priceless."

Another 2% from each transaction automatically creates liquidity that is sent to the dead address for **burning and locked forever** as it is integrated into the contract. This burning system forms an increasingly higher price floor for investors. The more the transactions, the more tokens the platform burns from circulation.

There are several advantages both investors and projects can derive from deflationary tokens. Pitbull's tokenomics aims to solve the issues with traditional finance as deflationary tokens have a positive impact on the crypto space.

Benefits of Pitbull's unique smart contract **tokenomics**:

- **Generates passive income for holders**
- **Enables secure investment with locked LP**
- **Increases \$PIT's value**
- **Decreases circulation supply from the market with transactions**

\$PIT contract applies to reducing supply in the market, increasing scarcity, and heightening the token demand. In the long run, this leads to an increment in the \$PIT's value.

Pitbull's smart contract is **safe by design**. It is an ownership-renounced token with each buy and sells automatically contributing to a liquidity pool that is locked forever. Furthermore, half of the total supply was burnt into a dead address in the project's beginning. It is impossible to modify Pitbull's contract, and it is impossible to pull liquidity from it. The team behind Pitbull is a fully volunteer team. Pitbull contract has been **audited and declared as secure** by TechRate, a **credible crypto audit company**.

Every Pitbull investor can work proactively to grow \$PIT. The decentralized nature of this project has positioned it for sustainability. The strength of Pitbull is in the community, which makes this project one of the pioneers of the thrilling age of social blockchain.

SECURITY

Pitbull is safe by design. It is an ownership-renounced token with each buy and sell automatically contributing to a **liquidity pool that is locked forever**. Furthermore, half of the total supply was burnt into a dead address in the project's beginning. It is impossible to modify & reach Pitbull's contract, and it is impossible to pull liquidity from it. The funds in the contract is locked there forever. The team behind Pitbull is a fully volunteer team. No one has access the contract address, which is locked forever.

No presale was conducted, allowing for a **fair launch**.

The ownership of Pitbull was renounced upon its creation to a dead address. The Pitbull Team consists entirely of community volunteers who are also invested in PIT. The initial liquidity and 50% of Pitbull's total supply was sent to the dead address at the project's beginning.

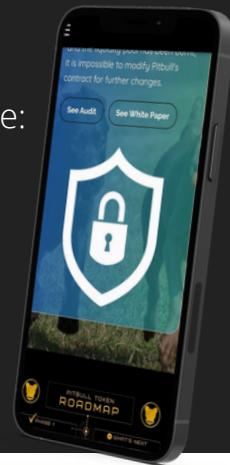

Pitbull smart contract was professionally audited by TechRate, declared as secure:

Audit Results

- No high-severity issues
- No medium-severity issues
- No low-severity issues – No owner privileges

Audit report is available to view on TechRate.org and on our GitHub:

<https://github.com/pitbullBSC/Audit/blob/main/Pitbull%20Official%20Audit.pdf>

Rank	Address	Quantity	Percentage	Value	Analytics
1	Burn Address	59,015,317,686,402,500.436623608	59.0153%	\$153,439,825.98	

Helpful Notes

Burn/Dead address - Address that has no one has any control or access to essentially 'dead'

Liquidity pool - A pool of paired tokens that can be swapped between each other. In the case of PIT/BNB, PIT can be swapped for BNB and vice versa.

Proof of Pitbull liquidity Dead Address Holding

<https://bscscan.com/token/0xb450cbf17f6723ef9c1bf3c3f0e0aba368d09bf5?a=0x000dead>

TOKENOMICS

The Tokenomics of Pitbull are as follows:

- 100,000,000,000,000 initial total supply
- 50% of the total supply burnt & sent to a dead address prior to release
- 500,000,000,000,000 max limit of PIT per trade
- **2%** of each transaction automatically distributed to all holders including the dead address. This grants PIT investors continual **rewards for holding** and decreases the circulating supply exponentially as the percentage of the dead address holding grows.
- Another **2%** from each transaction automatically creating liquidity that is sent to the dead address and locked forever. This forms an **increasingly higher price floor** for investors.
- Currently as of mid November over 59% of total supply has been burnt by transactions.

Passive staking income in your wallet

As per the contract, Pitbull holders automatically receive a distribution from 2% of each transaction of the Pitbull token. This function is a **unique and easy** way for holders to receive rewards directly to their wallet without the need to stake or farm on other platforms. This **saves gas fees** and allows compounding with ease of mind.

TRANSPARENCY

Transparency is one of the Pitbull Team's highest priorities. New volunteers are frequently added into the Pitbull Team to ensure community representation, and community voting is regularly conducted to help decide the best direction of the project.

For example, community votes have been taken on how to allocate funds, which exchanges to focus on, which shelters to donate to, and even which logo to use for the Pitbull token. The Pitbull Team hopes to evolve this into a governance system based on PIT holdings.

COMMUNITY WALLET

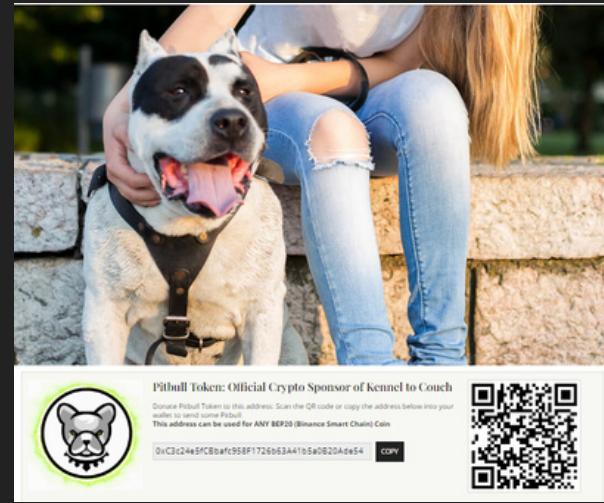

As a community-driven project with no dev wallets, the Pitbull Team opted to create a community wallet that members can donate to in order to further build the project. The community wallet has **multi-sig protection**, making it so multiple people are required to approve any transaction.

PARTNERSHIPS & CHARITY

Kennel to Couch (K2C)

Pitbull (PIT) is the official token for Kennel to Couch **crypto donations**. K2C is a **non-profit organization** that team with shelters and community partners to save at-risk pit bulls and provide support and incentives needed to encourage the **adoption of their sponsored pit bulls**. The Pitbull Team plans to implement tools for automatic donations to be made to Kennel to Couch when users purchase certain PIT NFTs, Merch, and more. Now it is possible to donate PIT to K2C.

<https://kenneltocouch.org/2021/05/crypto-sponsor-pit-token>

Pitbull Community has donated multiple **charities and animal shelter globally**.

What really matter to us for our **COMMUNITY**

Security

PITBULL one of the SAFEST projects on BSC Audited - Liquidity FOREVER

Quality

Providing Functional up-to-date Dapps for users with the Blockchain Technology

Delivery

Following each steps on our RoadMap and delivering what community needs on time

Financial Freedom

By creating strong fundamentals, we are aiming for PIT becoming a leading cryptocurrency for masses

Passive Income

2% of each transaction automatically distributed to holders.
This grants PIT investors continual rewards for holding

Transparency

2% of each transaction automatically distributed to holders.
This grants PIT investors continual rewards for holding

Constant Burning

Smart contract burns 2% of each transaction automatically, creating a liquidity in the dead address & locks forever. This forms and increasingly higher price floor for investors. Continuously decreasing supply increases scarcity of tokens.

PITBULL TOKEN ECOSYSTEM: DAPPS & PLATFORMS

The software and web development team is constantly working to bring new utility to PIT. Despite being only about two months old (launch date 03/17/2021), there are already various projects released and underway.

Our Product Portfolio

Launched - Live:

PITSWAP

<https://swap.pitbull.community/>

Automated Market Maker tool that allows easier trading experience for new investors to buy PIT. Future plans to evolve this Pit Swap into an ecosystem much like PCS that will involve in a creation of a new token that is co-beneficial with PIT for staking, farms, own routing and trading fees towards burning and project development. Tokenomics must be intensively researched before proceeding to the next stage.

PITFARM

<https://farm.pitbull.community/>

This will allow users to stake PIT-BNB v1 for points to redeem official Pitbull NFTs, or buy them straight out. These NFTs can be traded in the marketplace, and the sales will go towards the Pitbull community fund and artist as a minting fee. The funds raised will go towards charity, project development, and burning Pitbull tokens.

The funds from NFT sales are distributed for project marketing, shelter donations burnt in PIT liquidity pool for decreasing supply and for the minting, designing process of NFTs.

PITBULL TOKEN ECOSYSTEM: DAPPS & PLATFORMS

PITSTOP

<https://pitstop.pitbull.community/>

A special platform where all \$PIT tools can be accessed on a single page & a social network defined by one's address

Users can:
Monitor PitCharts for
any BSC Projects Track
\$PIT Holdings &
Earnings Connect to
PitSwap
Connect to PitLottery
and play

PITCHARTS

<https://pitstop.pitbull.community/pitchart>

A charting and analysis tool for all tokens on the Binance Smart Chain.

Once it is fully released, it will generate income from ad spaces and premium features that require PIT tokens to use, which will further help the burn and project funding.

PITLOTTERY

<https://pitstop.pitbull.community/pitlottery>

PitLottery is a unique game~lottery where users can win more \$PIT tokens by purchasing tickets with their \$PIT holdings. It will be a lottery platform rebase on Binance Smart Chain.

PITTRACKER

Investors can easily follow their PIT token holdings and see exactly how much they've accrued from the auto-staking rewards. No need to connect wallet to use tracker option. It is easy to use just pasting the wallet address. PitTracker is available in PitStop Dapp.

PITSTORE

This will allow users to purchase official Pitbull merch via PIT, USD and will plan to integrate PIT to the payment system.

Pitbull Token ECOSYSTEM: Dapps & Platfroms

PitSafe, an Ultimate Dapp by Pitbull

<https://safe.pitbull.community/>

PitSafe is a comprehensive **BSC DeFi Asset Manager**.

PitSafe offers exciting products for BSC token developers & investors. PITSAFE, DeFi Asset Manager aiming to secure investors, not only of Pitbull but any project's investors.

Starting on BSC, PitSafe will cover **Ethereum, Solana,**

Polygon, KucoinChain, Cardano, & more in next quarters following the roadmap.

PitMag

<https://www.pitmag.org/>

PitMag is **the first communication media created by a Token**, one of a kind, with the aim of informing about new milestones and news that impact the world and cryptocurrencies.

Our bilingual magazine, in downloadable PDF format and webzine, will deliver all kinds of useful information for all crypto communities in general, from special interviews, news from around the world, market analysis, **cutting-edge NFTs**, and big surprises for our community every month. Developed by the Pitbull community team for everyone.

PitDao

<https://vote.pitbull.community>

The term **DAO** stands for "decentralized autonomous organization" and can be described as an **open-source blockchain protocol** governed by a set of rules, created by its elected members, that automatically execute certain actions without the need for intermediaries. With PitDao, community members and investors propose an idea and vote for other proposals. This is the first step of Pitbull's evolving into **Governance Token**.

PITBURN INFO - Real Time PIT Burn Tracker

<https://pitburn.info/>

A platform where users can tracker real time data of auto PIT burning data, transactions, burn chart, an compare supply rates between tokens.

What is next for Pitbull Ecosystem?

PITPRICEBOT ON TELEGRAM

PIT Telegram PriceBot will be launch for all Crypto Projects. Users can tracker transactions any projects with PriceBot. Our channel will also accept ads.

PITDISCOVERY

A platform aiming to give insights and research tool for investors to discover news projects and their security details prior to invest.

PitFund (Planning)

This will be a fundraising platform which utilizes PIT as a currency to support those in need. A small service fee will be taken from each donation which will go to the Pitbull community fund wallet.

PITGAMES (PLANNING - BUILDING)

A section on the Pitbull website that will allow you to play a variety of games in-browser, including a card trading game and potentially a lottery game. PIT PlayToEarn P2E Gaming Model

PITGames will allow gamers pick up items in Augmented Reality & Metaverse to get real life rewards as well as donations to be used globally in vet clinics,shelters

Pitbull is going to be integrated into Metaverse World, aiming to become one of a kind in different fields of Blockchain.

PITMARKETPLACE (Planning)

PIT NFT marketplace will be a platform where Pitbull NFTs can be stored, displayed, traded and also minted. Users will be able to connect their wallets easily and securely to discover NFT world with PIT Market Place.

Periodical Activities & Events

PITBURN

The main idea behind PitBurn is straightforward: participants contribute a minimum amount of PIT by sending them to the event wallet address during a set period of time to be able to redeem an event ticket. A special event aiming to reduce PIT supply faster with a reward system to participants by sending a specific reasonable amount of tokens.

Locked and secured contract enables PIT to be one of the safest projects in the BSC network, however thanks to the PitBurn system, the community can cross this line participating voluntarily to help projects grow faster by having a chance to win PIT token as well. For the next rounds, besides the burning and reward, we are planning to include a share from this fund for the community wallet in favor of Pitbull.

Pitbull rare NFT series: Sales & Auctions

Colecciones de PIT NFT's con gráficas 3D, efectos especiales y con rotación, con música integrada y hasta producciones completas en calidad NFT.

PIT NFT MARKETPLACES

Las colecciones especiales de PIT NFTs se encuentran a la venta en varias plataformas y con diferentes colecciones cada una.

Los marketplaces que actualmente venden NFTs de PIT son:

- [OpenJungle](#)
- [TofuNFT](#)
- [Wolfible](#)
- [Opensea](#)

PITBULL TOKEN ROADMAP

✓ PHASE 1

- Website Branding
- Audit and Reviews by credible company
- BSCScan and Trust wallet Application
- Listings on Price indexing sites (CMC, FTX, Coingecko)
- Donations to Animal Shelters
- Relations with Crypto Youtubers and Influencers
- Multi-Sig community wallet

✓ PHASE 2

- Official Pitbull NFTs and Collectible Cards
- Listing on Coinbase Asset Tracker
- PitCharts and PitTracker Beta
- Listing on LunarCrush
- IndoEX Listing
- CoinTiger Listing
- WhiteBit Listing

✓ PHASE 3

- Donations for Major CEXs
- WhitePaper 1.0 Launch
- Hotbit Exchange Listing
- Widen Shelter donations and organizations
- LA Token Listing
- PitFarm NFT Farming launch
- PitSwap DEX Launch
- PitStop Dapp Launch
- Cointstats Listing
- PitLottery Dapp
- PitSafe DeFi Asset and Security Manager
- Interview with Crypto Media Agencies

▶ WHAT'S NEXT

- PitSafe Dapp Integration on ETHEREUM, KUCOIN, SOLANA, CARDANO, & POLYGON CHAIN
- Listings on Tier-1 Exchanges
- PitMag (Pitbull Magazine), the First Communication Media by a Token with a Unique Concept
- PIT Telegram PriceBot Launch for all Crypto Projects
- Release of Pitbull's First Premium NFT Collection of Special 3D Character cards
- Marketing Push/ Campaigns
- Press Releases on Top News Networks & Wires Globally
- Influencer Deals & Long-term Collaborations
- PitDiscovery Dapp Launch, Research Tool for Crypto Projects
- Listing \$PIT on Dex, Swaps & Pools
- Key Strategic Partnerships
- PitStop Performance Upgrade
- PitCharts, Product Ads Submits
- Multiple PitBurn Events
- Pitbull NFT Collaborations
- Whitepaper Update v2.0 with New Developments & More Language Options
- Partnerships & Donation Events with Shelter & Animal Hospitals worldwide
- Production of PIT Merchandise
- PitStore - Merchant Website Launch
- 60% of Total Supply's Burn with Transactions
- New Innovative Pitbull NFT Series
- Pitbull Staking in DEX and CEX
- PitGames Launch
- PIT PlayToEarn Gaming Model (PIT P2E Gaming System)
- PitGames Integration into Metaverse - In Augmented Reality (AR) & Metaverse user can get real life rewards or use rewards as donations to vet clinics or animal shelters globally.
- Online PIT Payment Options as a Real-world Currency & Shopping with Credit Card
- PitDao Launch, Community Propose, Community Vote
- PIT's Evolution into Governance Token & Expanding Pitbull Network across the Globe

PITBULL TOKEN NEW ROADMAP

Pitbull Team

Because the ownership of Pitbull was renounced upon creation, the Pitbull Team is composed entirely of volunteers. The community leads are:

Communications, Software Engineer
Web and Usecase Developers
Community Managers, Moderators
Marketing leads, Business developers
Marketing Strategist
Graphic Designers, NFT Artists, Musicians
Influencers, Youtubers
Social Media Handles

There are also various groups structured under the Pitbull Team, including but not limited to.

Administration members work together to coordinate the direction of the Pitbull project and propose helpful use cases for the token.

Marketing members analyze how to optimize social outreach and manage official Pitbull social media as ideally determined.

Media members design original images, videos, and music to promote the Pitbull project in a professional and engaging way.

Software/Web Development members work together to build various applications which utilize the PIT token. This is where applications like PitCharts, PitSwap, Pitfarm, PitSafe and so on are built.

In addition to this, The Pitbull Team has groups dedicated to writing, translation, communications, moderation, and support.

The number of volunteers is ever-expanding as the Pitbull project reaches a wider audience. Community is the strength of the project.
